

Technical Industrial Scales PCE-EP Serie

Pallet Scale PCE-EP 1500

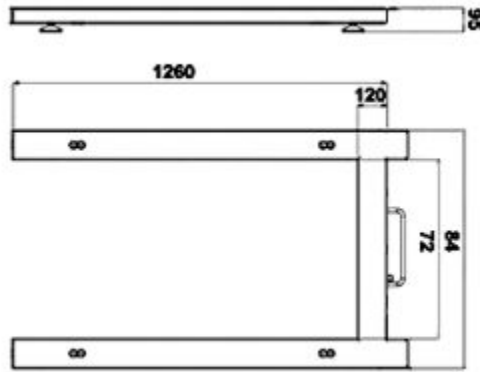

**Mobile Pallet Scale with 3 ranges,
weight range up to 1.500 kg**

This Pallet Scale PCE-EP 1500 allows you load directly in the ramp in no time at all. This model of Pallet Scale is the ideal solution for fast and precise mobile weighing in industrial and warehousing applications, in shipping and receiving applications and in inventory control. Now, you don't need to move with big efforts the pallet up to the scale. You only have to bring near the scale the merchandise to weigh, and you will be able to have a good control of the process. The Pallet Scale is transported without problems. In the front view you have a handle to elevate it and in the sides of the scale, you have some wheels. The display has been mounted in the back part of the Pallet Scale (ideal for its transport), nevertheless you can remove it and place it where you want.

- Three ranges for high accuracy
- Accuracy $\pm 0,05$ % of current value
- Large display 25 mm removable
- Automatic calculation of the tare, manual insert of tare, adder function
- Steel lacquering housing (it can be carried)
- Battery supply which allows an universal use
- Wheels and handle for a good transport
- Adjustable leveling foot
- Auto power off for battery protection
