Technical Vibration Analyzer PCE-VDR 10

PCE-VDR 10 is a single-axis accelerometer or vibration monitor with real-time measurement and data logging capabilities. This vibration analyzer records acceleration (m/s, g, ft/s) as well as speed (mm/s, cm/s, in/s) measurements and saves the measured data to an included SD card memory. Note: To set up the SD card for the first time, the PCE-VDR 10 must be connected to AC power.

Note: To set up the SD card for the first time, the PCE-VDR 10 must be connected to AC power (AC power supply NET-LUT or NET-LUT-US sold separately - see accessories tab).

- Measures acceleration (m/s, g, ft/s) and speed (mm/s, cm/s, in/s)
- Adjustable automatic data logging
- SD card memory
- RS-232 and USB interface
- Data can be downloaded to a computer and analyzed using Microsoft Excel
- Backlit LCD screen
- Portable
