Technical Thickness Gauge PCE-CT 50

PCE-CT 50 Thickness Meter

Digital, electronic mil gage, paint gauge or tester for non-destructive measurement of nonmagnetic coating, insulating layer and dry film thickness (DFT) on non-ferrous metal substrates

PCE-CT 50 is a digital, electronic mil gage, paint gauge or tester that takes non-destructive measurements of nonmagnetic coating, insulating layer and dry film thickness (DFT) on **only non-ferrous** metal substrates such as aluminum. Ideal for surface testing, automotive paint inspection, material testing and manufacturing quality control applications, this thickness meter is designed to measure layers of paint, ink, plastic, chrome, copper, zinc, enamel, paper, glass, rubber and similar materials.

- Features an internal sensor with v-groove interface for reliable measurement on curved surfaces such as axles
- Comes with a set of calibration standards
- Allows for automatic or manual shut off
