## PCE Instruments

PCE Instruments is a producer and provider of powerful and innovative products in the fields of measuring techniques, control equipment, weighing equipment and laboratory equipment. The product Portfolio covers a wide ranging product pallet in these sections, but not at least with their own product line the PCE-Series. Among the objectives is a long time customer satisfaction, which is achieved not only by the wide range of PCE products but all in all by competent and fair advice.

Especially for the customer, there is a field staff worker all day all over Germany to introduce the Customer-leading products to lift the anonymity of the Internet. PCE Instruments was founded in 1999 by three graduate engineers. Since then the company has expanded and is still building up in new places and lands. Already founded sites are located in Spain,

Italy, England, Chile, Netherlands, France, Turkey, Poland, China, USA and Hong Kong.

A special emphasis is being placed on the expansion of the departments of "research and development". Its customers include the research, testing and service departments of many renowned companies from various industries, as well as defence related departments, universities, research institutions, etc. In 2012, all sites were united under the PCE-HOLDING GmbH in order to be well prepared for future growth.

Andreas Barth, Managing director, PCE Holding GmbH

## Perfect solution for every industry

## Organigramm

## PCE Instruments International

PCE Instruments also uses the potential of trade fair appearances as an instrument of brand popularization for its own product line.

Elektrotechnik Dortmund  
Germany

TechExpo Moskau  
Russia

MIAC Lucca  
Italy

## Measurement

Measurement is one of the key areas of the company PCE Instruments, here you can find instruments such as handheld instruments, panel meters and instruments for measurement, analysis and investigation, from a simple handheld instrument for quick onsite measurement to analysis by using spectrometers, PCE offers the right solution for your measuring tasks.

The collection of data is becoming increasingly important in industry, trade and research, mainly workable demanding measurement techniques are needed that work very fast and accurate and gives reproducible results when measuring, far more than 650 devices and measuring arrangements to meet these requirements you can receive from us.

- accurate

- reproducible

- durable

## Scales and Balances

Scales for classical tasks ( laboratory scales, parcel scales, hanging/crane scales ):

All of these have performance and features, which for a fast and reliable processing of the weighing tasks are required, a high variety of features distinguish our products : data transmission, piece counting, dispensing function, limit weighing. The scales are calibrated by delivery or calibrated at the factory.

Special weighing solutions ( runway scales, conveyer scales, container / silo scales ):

We realize individual wishes adapted to your production processes.

- highly accurate

- highly accurate

- sturdy

## Control Systems

Control Technology from PCE enables continuous optimization of your processes and systems, our product and system range covers solutions for data acquisition, control, control and visualization for essential process variables ( temperature, humidity, pressure, force, vibration, energy ).

We offer a future proof response to the ever increasing needs of machinery and equipment, and this across different industries, it is also possible at any time to modify existing variants and adapt to your requirements.

Discuss your project with our colleagues by phone or make an appointment with the sales force.

- modular

- effective

- remote effect

## Laboratory Equipment

Our products for laboratories meet all requirements for the classical laboratory analysis, from routine testing to extremely complex investigations in the field of research.

The goal is clear to offer the practitioners in the laboratory equipment of the highest standards.

Employees in chemical, pharmaceutical laboratories and laboratory staff of production laboratories should always be able to concentrate on what they are doing and so view the laboratory equipment and laboratory facilities as a reliable aid.

- precise

- user friendly

- economical
