

Test Stand for Motorised Probe PCE-5000-STAND

The PCE-5000-STAND test stand for the PCE-5000 hardness tester is used to support the automatic test probes. The test stand allows automated measurements, with a higher reproducibility of tubes and round material. The test stand can, of course, be used for flat surfaces.

Note: Automatic test probes and meter are not included.

- ▶ Measuring stand for PCE-5000 hardness tester
- ▶ Support of automatic test probes

Specifications

Scope of application	Test stand for supporting the PCE-5000 automatic test probes. Measurement of materials on pipes and round bodies. Can also be used for flat surfaces.
Material	Magnesium Aluminium
Weight	ca. 1.6 kg
Dimensions	205 x 142 x 284 mm / 8 x 5.6 x 11.2 in
