

Benchtop Scale PCE-SCS 30

Low-cost benchtop scale up to 30 kg, Readability 2 g, Mains and battery operation, Large 20 mm LC display, Removable stainless steel platform, Zero and tare function

The benchtop scale has a 300 x 400 mm stainless steel platform that can be removed for cleaning. Flexible use of the mobile platform scale is made possible not only by the light weight and compact dimensions, but also by the independent power supply, which is possible with the 6V4Ah rechargeable battery.

If the 4 load cells of the benchtop scale with a weighing capacity of 30 kg and a resolution of only 2 g require an adjustment, this can be done quickly and easily using external weights (optional) in the calibration function of the platform scale. Thanks to the key operation, the fast response time of the platform scale and the easy-to-read 20 mm LCD display, this platform scale is ideally suited for mobile and fast weighing applications.
