

PCE INSTRUMENTS ACQUIRES LONG-ESTABLISHED COMPANY A & P INSTRUMENTS

[Lemgo, Germany, 19/12/2024] - PCE Instruments, a leading provider of modern measurement technology, is pleased to announce the acquisition of the long-established company A & P Instruments. With an impressive company history dating back to 1925, A & P Instruments has always stood for innovation and quality.

The company has established itself as a renowned manufacturer of moisture analysers that are known for their precision and reliability.

Annegret Ukena plays a central role in this. She is the granddaughter of August Gronert, who developed the

pioneering moisture analyser in 1950 and had a lasting impact on the industry. Mrs Ukena continues this legacy and manages the divisions of technical purchasing, assembly and development with a high level of expertise.

The integration of A & P Instruments into the PCE Instruments product portfolio represents an important strategic step. The highly specialised products ideally complement the existing range and enable us to offer customers even more comprehensive solutions.

Both companies are looking forward to a common future with great confidence. This acquisition creates added value for customers, employees and partners and combines tradition with state-of-the-art technology.

PCE Instruments would like to thank all those involved for their trust and looks forward to continuing the success story of A & P Instruments and setting new standards in measurement technology together.

About PCE Instruments:

PCE Instruments is a leading supplier of measurement technology and stands for innovation, precision and the highest quality. With a broad product portfolio and a dedicated team, PCE Instruments continuously works on strengthening and expanding its market position.

About A & P Instruments:

A & P Instruments can look back on almost a century of experience and is a recognised specialist in moisture analysers. The company combines tradition and innovation and will continue to maintain its high quality standards in the future.
