MANUAL **Moisture Analyser** PCE-W3 238 h "HAD PCE MOISTURE METER FOR WASTE PAPEN PSEWI

1. Application

Moisture Meter for WastePaperis designed to rapidly det

2. Operation principle

Moisture meter measures the resistance of the m ate rial (waste paper). It has been calibrated for normal composition of waste paper.

3. Technical data

Range	6%- 30%
Power	9V,1 battery 6F22
Electrode length	85 mm
Size	80 * 180 * 250 mm

Limitations

This warranty becomes null and void if you fail to pack your PCE-W3 in a mamer consistent with the original product packaging and dam-age occurs during product shipment. This warranty does not cover: circumstance beyond our company's control; servicer equired as the result of unauthorized modiÿcations or service; misuse, abuse; failure to follow our com pany operating or main tenance instructions. Our comp any will not be responsible for any special, consequential or incidental damages resulting fr om the purchase, use, or im proper functioning of this equipment regardlessof the cause. Such damages for which our company's will not be responsible include, but are not limited to, loss of revenue or proÿt, downtime cost s, lossof use of the equipment, cost of any substitute equipment, facilities of serices, or claims of your customersfor such damages.

GUARANTEE

The manufacturer guarantees the correct functioning of the Moisture Meter for Waste Paper PCE-W3 uder normal use for a period of 12 months.

CE

ermine the level of moisture contents of waste paper.

4. Measurements

Conduct the measurements of moisture contents of waste paper following these steps:

- take the device out of its case and remove the protective cap,
- connect the device with the electrode using the wire provided,
- turn the power on,
- slide the electrode into the waste paper (if it's compressed) or firmly press the electrode against a single piece of waste paper,
- read the result,
- repeat the measurement with at least 3 randomly selected samples,
- the final result is an average of all the measurements,
- turn the power off.

WARNING:

The measuring range of the device is 6% - 30%. Moisture contents below 6% is indicated as "LO". Results over 30% should be considered as rough estimates.

5. Changing the battery and storage

The device is equipped with a power level control circuit. When the power drops below acceptable level a sign "LO BAT" appears on the left side of the LCD. This indicates that the battery has expired and should be replaced with a new one. To replace the battery unscrew the screw on the back of the instrument and carefully remove the back panel. Store the device in a dry place.
